Comments: Caution: The reported STR profile from CLS of this cell line was changed in June 2019. Seven conflicts with other sources were resolved., Anecdotal: Have been flown in space on Foton-10 and Foton-M3 to study if differentiation is altered in microgravity (PubMed=9144345; PubMed=9600771; PubMed=24903274)., Characteristics: Can be induced to differentiate by treating the cells with 1,25-dihydroxyvitamin D3 and TGF-beta. The cells do not differentiate into the mineralized state, but stop at the matrix maturation stage (PubMed=1577731)., Population: Caucasian., Part of: MD Anderson Cell Lines Project., Part of: COSMIC cell lines project., Part of: Cancer Dependency Map project (DepMap) (includes Cancer Cell Line Encyclopedia - CCLE)., Group: Space-flown cell line (cellonaut).
