Description: Cell line RAW-Dual is a Cancer cell line with a species of origin Mus musculus (Mouse)

Sex: Male

Disease: Mouse leukemia

Comments: Characteristics: Stably expresses two reporter genes: SEAP (secreted ALPP) and the Lucia luciferase. ALPP expression depends on the activation of the endogenous MIP-2/CXCL2 promoter as the Cxcl2 gene has been replaced by ALPP. The Lucia luciferase reporter gene is under the control of an ISG54 minimal promoter in conjunction with 5 IFN-stimulated response elements (ISRE) (InvivoGen=rawd-ismip).
