3AB-OS

RRID:CVCL_LM95

Type: Cell Line

Proper Citation

RRID:CVCL_LM95

Cell Line Information

URL: https://web.expasy.org/cellosaurus/CVCL_LM95

Proper Citation: RRID:CVCL_LM95

Description: Cell line 3AB-OS is a Cancer cell line with a species of origin Homo sapiens (Human)

Sex: Female

Disease: Embryonal rhabdomyosarcoma

Defining Citation: [PMID:19160414](#), [PMID:23129384](#)

Comments: Characteristics: Was thought to have cancer stem cell-like characteristics as it was thought to be produced by long term treatment of MG-63 with 3-aminobenzamide (3AB), an inhibitor of poly(ADP-ribose) polymerase., Population: Caucasian., Problematic cell line: Contaminated. Shown to be a RD derivative (personal communication of Millipore). Originally thought to be a MG-63 derivative..

Category: Cancer cell line

Organism: Homo sapiens (Human)

Name: 3AB-OS

Cross References: cancercellines:CVCL_LM95, Millipore:SCC141, Wikidata:Q54585282

ID: CVCL_LM95

Hierarchy: cvcl_1649

Record Creation Time: 20220427T215049+0000

Record Last Update: 20260802T005606+0000

Ratings and Alerts

No rating or validation information has been found for 3AB-OS.

Warning: Problematic cell line: Contaminated. Shown to be a RD derivative (personal communication of Millipore). Originally thought to be a MG-63 derivative.

Registration: International Cell Line Authentication Committee, Register of Misidentified Cell Lines; ICLAC-00545.

Characteristics: Was thought to have cancer stem cell-like characteristics as it was thought to be produced by long term treatment of MG-63 with 3-aminobenzamide (3AB), an inhibitor of poly(ADP-ribose) polymerase., Population: Caucasian., Problematic cell line: Contaminated. Shown to be a RD derivative (personal communication of Millipore). Originally thought to be a MG-63 derivative.. **Warning:** Discontinued: Millipore; SCC141
