Description: Cell line 4B6/3598/3442#2/4011/4014C1-2 is a Transformed cell line with a species of origin *Mus musculus* (Mouse)

Sex: Sex unspecified

Defining Citation: [PMID:23884459](#)

Comments: Characteristics: Transfected with reverse tetracycline-controlled transactivator (rtTA), a fusion between a mutated version of *E.coli* TetR and the activating domain of HSV-1 VP16., Characteristics: To generate this cell line the parental cells were transiently transfected with a plasmid pMA4014, which encodes mCherry and FLPO and flow sorted for transfected cells. As a result of FLPO-mediated excision of the MTS in front of the bacterial ligA gene, mitochondrial import of ligA in this cell line is inefficient and mtDNA is maintained at a reduced copy number (Kerafast=ESA105).
