Target Antigen: CAMKIIN antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: ELISA; Not yet tested - our routinely used western blotting protocol does not allow detection of proteins as small as the calculated size of 8.70kDa according to NP_150284.1. Therefore we cannot recommend an optimal concentration and the product is investigative grade. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported? ELISA.
