Target Antigen: Serotonin receptor 3A / HTR3A antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: ELISA; Western Blot; ELISA, Western Blot. Approx 55kDa band observed in Human Colon lysates (calculated MW of 55.3kDa according to NP_000860.1. Recommended concentration: 0.3-1µg/ml. An additional band of unknown identity was also consistently observed at 200kDa. This band was successfully blocked by incubation with the immunising peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported? This antibody is expected to recognise both reported isoforms (NP_998786.1 and NP_000860.1).
