Target Antigen: Recombinant His-tagged human GFR alpha-2 protein produced using CHO-based cell line. For production of hGFR alpha-2, glycosylphosphatidyl-inositol GPI-anchor was removed and protein was secreted to the cell culture supernatant. Protein was purified by Ni-affinity chromatography following gel-filtration from cell culture supernatant.

Host Organism: chicken

Clonality: unknown

Comments: WB, ICC. A dilution of 1:5,000 to 1:10,000 is recommended for Western blot and 1:500 to 1:1,000 for Immunocytochemistry. Biosensis recommends optimal dilutions/concentrations should be determined by the end user.
