Target Antigen: Cystatin B / Stefin B antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: IgG; IgG Preliminary experiments gave no signal but low background in human brain lysates at up to 1µg/ml. However this used our routine western blotting protocol which we would not expect to reliably detect proteins as small as the predicted size of approx. 11KDa according to NP_000091. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates?
