Target Antigen: MMP22 antibody

Host Organism: rabbit

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: IgG; IgG WB: Use at an assay dependent dilution. By blotting against the reduced protein, the antibody identifies bands at 70 kDa and 66 kDa. This is larger than the predicted 53 kDa and possibly represents alternative splicing, posttranslational modifications, aggregation, or other phenomenon. A minimum working antibody dilution of 1/1000 is determined by blotting a tissue cell lysate with an alkaline phosphatase conjugated secondary antibody and BCIP/NBT as the substrate. A starting dilution of 1/5000 of is recommended for chemiluminescent substrates. Not tested in other applications. Optimal dilutions/concentrations should be determined by the end user. Western Blot.; Other; Western Blot
