Proper Citation: GeneTex Cat# GTX11797, RRID:AB_372320

Target Antigen: TIMP2 antibody

Host Organism: rabbit

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: IgG; IgG WB: Use at a dilution of 1/1000. Predicted molecular weight: 23 kDa. For immunoblotting with chemiluminescent substrates, a starting dilution of 1/5000 is recommended. Higher antibody concentrations may be necessary for non-human samples. Note: TIMP2 is constitutively produced in low (pg/ml) levels in most cell types in tissue culture. The low protein levels produced often require concentration of the cell culture media to visualize the bands by immunoblotting. Not tested in other applications. Optimal dilutions/concentrations should be determined by the end user. Western Blot.; Western Blot
