Target Antigen: Actin-like 7B (mouse) antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: ELISA, Western Blot. Approx 45kDa band observed in Rat Testis lysates (calculated MW of 45.5kDa according to Rat NP_001020588.1 and 45.6kDa according to Mouse NP_079547.1). Recommended concentration: 0.5-1.5µg/ml. An additional band of unknown identity was also consistently observed at 30kDa. This band was successfully blocked by incubation with the immunising peptide. We would appreciate any feedback from people in the field - have any such results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported? This antibody is not expected to cross-react with Actin-like 7A.; Western Blot; ELISA
