Target Antigen: FOXI1 / FKHL10 antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: ELISA; Immunohistochemistry; Preliminary experiments gave bands at approx 50 kDa and 25 kDa in Human Kidney lysate after 1ug/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the bands we observe given the predicted sizes of 41.0kDa according to NP_036320 (isoform a) and 30.8kDa according to NP_65892 (isoform b). The bands were successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported? Immunohistochemistry: This product has been successfully used in Mouse Epididymus (Blomqvist et al, EMBO J. 2006 Sep 6;25(17):4131-41. PMID 16932748). This antibody i
