Target Antigen: MLL4 antibody

Host Organism: goat

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: Immunohistochemistry; ELISA; Preliminary experiments gave no signal but low background in Human Heart lysates at up to 1µg/ml. However this used our routine western blotting protocol which we would not expect to reliably detect proteins as large as the predicted size of approx. 312KDa according to NP_055542. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates?
Immunohistochemistry: In paraffin embedded Human Testis shows cytoplasm staining of spermatids. Recommended concentration, 5-10µg/ml. ELISA, Immunohistochemistry.
