AICSDP-29: LMNB1-mTagRFP-T

RRID:Addgene_114403

Type: Plasmid

Proper Citation

RRID:Addgene_114403

Plasmid Information

URL: <http://www.addgene.org/114403>

Proper Citation: RRID:Addgene_114403

Insert Name: LMNB1 Homology Arms with mTagRFPT-linker

Organism: Homo sapiens

Bacterial Resistance: Ampicillin

Vector Backbone Description: Vector Backbone:pUC57; Vector Types:Mammalian Expression, CRISPR, Donor Template; Bacterial Resistance:Ampicillin

Comments: This plasmid has been used with locus-specific CRISPR/Cas9 to add a mTagRFP-T tag to the N-terminus of human LMNB1 in WTC human induced pluripotent stem cells by the Allen Institute for Cell Science. Linker (AA) sequence: SGLRSRAQAS. After protein tagging using this donor template plasmid and CRISPR/Cas9 reagents, transfected cells may exhibit varying intensity levels of fluorescence, likely due to editing precision. To obtain cells of uniform intensity levels, see our protocol for fluorescence-assisted cell sorting and subcloning of transfected cells (<https://www.allencell.org/instructional-videos-and-tutorials-for-cell-methods.html>). Further, we recommend PCR-based assays for identifying precisely edited clones as previously described (<https://www.molbiolcell.org/doi/abs/10.1091/mbc.e17-03-0209>). For more information on the entire plasmid collection, please see <https://www.addgene.org/allen-institute-cell-science/>.

Plasmid Name: AICSDP-29: LMNB1-mTagRFP-T

Relevant Mutation: homology arms contain point mutations to disrupt crRNA binding sites used

Record Creation Time: 20220422T221559+0000

Record Last Update: 20260815T080223+0000

Ratings and Alerts

No rating or validation information has been found for AICSDP-29: LMNB1-mTagRFP-T.

No alerts have been found for AICSDP-29: LMNB1-mTagRFP-T.
