[pBS302](#)

RRID:Addgene_11925

Type: Plasmid

Proper Citation

RRID:Addgene_11925

Plasmid Information

URL: <http://www.addgene.org/11925>

Proper Citation: RRID:Addgene_11925

Insert Name: STOP

Bacterial Resistance: Ampicillin

Defining Citation: [PMID:8231893](#)

Vector Backbone Description: Backbone Size:3806; Vector Backbone:n/a; Vector Types:Mammalian Expression, Cre/Lox; Bacterial Resistance:Ampicillin

Comments: pBS302 carries two directly repeated loxP sites flanking a synthetic DNA sequence designated "STOP." The lox-square STOP cassette sits on a NotI fragment that can excised and gel-purified for injection into fertilized zygotes. The STOP sequence is designed to thwart productive expression of a downstream gene under the control of an upstream promoter (to be inserted in the SfiI-SpeI polylinker region). It will have been removed in cells expressing Cre, or in descendants of cells that previously had expressed Cre, because of Cre-mediated recombination at the loxP sites. The STOP sequence is the same as used to regulate T-Ag expression in pBS241.

Plasmid Name: pBS302

Record Creation Time: 20220422T221624+0000

Record Last Update: 20260815T080311+0000

Ratings and Alerts

No rating or validation information has been found for pBS302.

No alerts have been found for pBS302.
