pBSDONR P4r-P2

RRID:Addgene_121527

Type: Plasmid

Proper Citation

RRID:Addgene_121527

Plasmid Information

URL: <http://www.addgene.org/121527>

Proper Citation: RRID:Addgene_121527

Bacterial Resistance: Chloramphenicol and Ampicillin

Defining Citation: [PMID:21343429](#)

Vector Backbone Description: Backbone Marker:Stratagene; Backbone Size:2900; Vector Backbone:pBlueScript; Vector Types:Bacterial Expression; Bacterial Resistance:Chloramphenicol and Ampicillin

Comments: Contains Gateway Entry Cassette with ccdB gene and chloramphenicol resistance. To make this vector, sequences from the GateWay cassettes of pDONR221 P4r-P3r and pDONR221 P3-P2 were subcloned into pBlueScript. The purpose of this was to create a DONR vector with ampicillin resistance rather than kanamycin resistance, which facilitates use of kanamycin resistant destination vectors. The combination of P4r-P2 att sites enables multisite Gateway cloning in which the N-terminal sequence is cloned into a P1-P4 donor vector and the C-terminal sequence is cloned into this vector, with the destination vector containing P1-P2 att sites.

Plasmid Name: pBSDONR P4r-P2

Record Creation Time: 20220422T221636+0000

Record Last Update: 20260815T080337+0000

Ratings and Alerts

No rating or validation information has been found for pBSDONR P4r-P2.

No alerts have been found for pBSDONR P4r-P2.
