Proper Citation: RRID:Addgene_125258

Insert Name: single chromosomal copy of yhhX target sequence upstream from mcherry reporter gene under control of a constitutive promoter

Bacterial Resistance: None

Defining Citation: [PMID:31377338](#)

Vector Backbone Description: Vector Backbone:none; Vector Types:; Bacterial Resistance:None

Comments: Genotype: The expression of mcherry can be visualized or measured with a spectrophotometer. The yhhX target sequence followed by a mcherry reporter gene carried by an integrative vector based on pOSIP-KL was integrated at the lambda attB site in the chromosome of E. coli MG1655 and the backbone was flipped out using the pE-FLP (AmpR, #45978, Addgene) plasmid. This strain can be used to optimize dCas9 expression levels
