pGBW-m4137384

RRID:Addgene_149543

Type: Plasmid

Proper Citation

RRID:Addgene_149543

Plasmid Information

URL: <http://www.addgene.org/149543>

Proper Citation: RRID:Addgene_149543

Insert Name: SARS-CoV-2 S (surface glycoprotein)

Organism: Homo sapiens

Bacterial Resistance: Ampicillin

Vector Backbone Description: Backbone Size:860; Vector Backbone:AmpR gene, with start and stop codons; Vector Types:Mammalian Expression; Bacterial Resistance:Ampicillin

Comments: NCBI reference sequence: YP_009724390.1 . This plasmid contains an 18 or 19bp truncation in the CMV promoter and was synthesized for making pseudotyped VSV particles. It has been shown that truncations either help expression and /or capture by VSVdeltaG. See <https://www.ncbi.nlm.nih.gov/pubmed/19057867> for original paper on VSV pseudotyping, and [https://www.cell.com/cell/pdf/S0092-8674\(20\)30229-4.pdf](https://www.cell.com/cell/pdf/S0092-8674(20)30229-4.pdf) on more recent efforts with SARS-CoV-2. Please note: Addgene NGS finds that the AmpR resistance marker is in the opposite orientation in the plasmid relative to the depositor's sequence. As the plasmid was able to grow in media with Ampicillin, this is not expected to affect plasmid function.

Plasmid Name: pGBW-m4137384

Relevant Mutation: H. sapiens recode

Record Creation Time: 20220422T221830+0000

Record Last Update: 20260829T075708+0000

Ratings and Alerts

No rating or validation information has been found for pGBW-m4137384.

No alerts have been found for pGBW-m4137384.
