Vector Backbone Description: Vector Backbone:self-made; Vector Types:Yeast Expression; Bacterial Resistance:Spectinomycin

Comments: Storage plasmid for type 1 expression vectors -- i.e., fusions to ZF-2 (ZF 42-10). To insert barcoded genes: i) digest this plasmid with BbsI and MfeI ii) digest the barcoded gene with BsaI -- making sure the resultant overhangs match the BbsI and MfeI sites iii) ligate the two digestion products. Terminators can be added to the barcoded ligation product via a BbsI golden gate reaction.
