RRID:Addgene_27186

Type: Plasmid

Proper Citation

RRID:Addgene_27186

Plasmid Information

URL: <http://www.addgene.org/27186>

Proper Citation: RRID:Addgene_27186

Insert Name: Zinc finger array targeting zgc:153086

Organism: Danio rerio

Bacterial Resistance: Kanamycin

Defining Citation: [PMID:18657511](#)

Vector Backbone Description: Backbone Size:5493; Vector Backbone:MG414; Vector Types:Zebrafish Targeting; Bacterial Resistance:Kanamycin

Comments: This plasmid encodes a zinc finger array targeting half of a target sequence in the zebrafish gene zgc:153086 (see below). Please note that this plasmid does NOT contain the zgc:153086 sequence. Users must order the complementary plasmid zgc:153086_R (OZ512) [Addgene plasmid 27187] in order to create a zinc finger nuclease (ZFN) pair to introduce targeted mutations into this specific zebrafish gene. Users will also need to clone the zinc finger (ZF) insert of this plasmid into a zinc finger nuclease (ZFN) vector to express a FOKI fusion product. Examples of possible ZFN expression vectors that can be used are: pST1374 (Addgene plasmid 13426), pMLM290 (Addgene plasmid 21872), pMLM292 (Addgene plasmid 21873), pMLM800 (Addgene plasmid 27202) and pMLM802 (Addgene plasmid 27203). This zinc finger array was tested for binding activity to the sequence 5'-GGTGATGCT-3' in a bacterial two hybrid assay, and resulted in 11.90 fold activation. However, this array has not yet been tested for activity as a zinc finger nuclease (i.e. for its ability to induce mutations at the intended locus). Scientists using this zinc finger array in a publication should notify zebrafishzfs@zincfingers.org and acknowledge NIH grant number R01 GM088040 in the publication.
