K15-EGFP

RRID:Addgene_44266

Type: Plasmid

Proper Citation

RRID:Addgene_44266

Plasmid Information

URL: <http://www.addgene.org/44266>

Proper Citation: RRID:Addgene_44266

Insert Name: K15 promoter (-4.8)

Organism: Mus musculus

Bacterial Resistance: Kanamycin

Defining Citation: [PMID:15024388](#)

Vector Backbone Description: Backbone Marker:Clontech; Backbone Size:4737; Vector Backbone:pEGFP-N2; Vector Types:Mammalian Expression, Mouse Targeting, Fluorescence microscopy; Bacterial Resistance:Kanamycin

Comments: Alternate plasmid name: pEGFP-N2 K15 The K15 promoter was cloned from C57 BL/SJ mouse genomic DNA (isolated from tail) by PCR using the Supermix High Fidelity Kit (GIBCO). The sequences of the forward and reverse primers were CTGAGCTACCAGCGAGACTCC (K15F1) and TTCCTGTCCCTAGCAAGCAGGAGAG (K15R1), respectively. XhoI and EcoRI restriction sequences were added to the 5' end of forward and reverse primers respectively for subsequent cloning of the PCR product into PBK/CMV vector (Stratagene). The promoter fragment was then subcloned into pGEGFP-N2 The entire K15 promoter-EGFP transgene can be released by digestion with XhoI/AflII.

Plasmid Name: K15-EGFP

Relevant Mutation: Contains the murine K15 promoter (-4.8) fragment

Record Creation Time: 20220422T222229+0000

Record Last Update: 20260815T081514+0000

Ratings and Alerts

No rating or validation information has been found for K15-EGFP.

No alerts have been found for K15-EGFP.
