Vector Backbone Description: Vector Backbone:based on pUC18; Vector Types:Cloning Vector; Bacterial Resistance:Ampicillin

Comments: Accession number KR029106. By Omega-PCR cloning, an E. coli promoter-LacZ sequence (198 bp in length) was inserted. The LacZ marker gene can be used to facilitate selection of Escherichia coli positive CRISPR/Cas9 clones carrying the sgRNA expression cassettes. Please see our published protocol for using these plasmids. Ma, X. and Liu, Y.-G. 2016. CRISPR/Cas9-based multiplex genome editing in monocot and dicot plants. Curr. Protoc. Mol.
