

Resource Summary Report

Generated by [RRID](#) on Sep 3, 2026

AICSDP-35:AAVS1-mEGFP

RRID:Addgene_91565

Type: Plasmid

Proper Citation

RRID:Addgene_91565

Plasmid Information

URL: <http://www.addgene.org/91565>

Proper Citation: RRID:Addgene_91565

Insert Name: AAVS1 Homology Arms with CAGGS driven mEGFP

Organism: Homo sapiens

Bacterial Resistance: Ampicillin

Vector Backbone Description: Vector Backbone:unknown; Vector Types:Mammalian Expression, CRISPR, Donor Template; Bacterial Resistance:Ampicillin

Comments: This plasmid has been used with locus-specific CRISPR/Cas9 to insert a CAGGS-mEGFP at the AAVS1 safe harbor locus in WTC human induced pluripotent stem cells by the Allen Institute for Cell Science. After insertion of the reporter using this donor template plasmid and CRISPR/Cas9 reagents, transfected cells may exhibit varying intensity levels of fluorescence, likely due to editing precision. To obtain cells of uniform intensity levels, see our protocol for fluorescence-assisted cell sorting and subcloning of transfected cells (<https://www.allencell.org/instructional-videos-and-tutorials-for-cell-methods.html>). Further, we recommend PCR-based assays for identifying precisely edited clones as previously described (<https://www.molbiolcell.org/doi/abs/10.1091/mbc.e17-03-0209>). For more information on the entire plasmid collection, please see <https://www.addgene.org/allen-institute-cell-science/>.

Plasmid Name: AICSDP-35:AAVS1-mEGFP

Record Creation Time: 20220422T222619+0000

Record Last Update: 20260902T050517+0000

Ratings and Alerts

No rating or validation information has been found for AICSDP-35:AAVS1-mEGFP.

No alerts have been found for AICSDP-35:AAVS1-mEGFP.

Data and Source Information
