Vector Backbone Description: Vector Backbone:pRS424; Vector Types:Yeast Expression; Bacterial Resistance:Ampicillin

Comments: Plasmid pJU225 (PRP8 TRPI2p) was constructed from a previously described plasmid JDYI3 (GAL::PRP8) (BROWN and BEGGS 1992). The galactose driven promoter in this plasmid was removed by cutting with NheI and XhoI. A wild-type copy of the promoter was amplified by PCR under nonmutagenic conditions and used to replace the galactose driven promoter. The entire PRP8 gene was then excised using XhoI and NotI and ligated to plasmid pRS424 (TRPI 2p) also cut with XhoI and NotI.
