Proper Citation: RRID:Addgene_165580

Insert Name: Bovine DNTT

Organism: Other

Bacterial Resistance: Ampicillin

Vector Backbone Description: Vector Backbone:pBuild; Vector Types:Synthetic Biology; Bacterial Resistance:Ampicillin

Comments: Adds dT at the end of PCR blunted DNA fragments/vectors that can then be used in TOPO cloning; Addition of homopolymer tails to the 3' ends of DNA; Labeling the 3' ends of DNA with modified nucleotides (e.g., ddNTP, DIG-dUTP); TUNEL assay (in situ localization of apoptosis); TdT dependent PCR. The plasmids in the Open Enzyme collection contain genetic parts and are not functional by themselves. Researchers can clone these enzymes into an expression vector of their choice and then transform into E. coli bacteria for expression and purification.
