XE180 rat Frizzled-1-pCD

RRID:Addgene_16820

Type: Plasmid

Proper Citation

RRID:Addgene_16820

Plasmid Information

URL: <http://www.addgene.org/16820>

Proper Citation: RRID:Addgene_16820

Insert Name: frizzled-1

Organism: Rattus norvegicus

Bacterial Resistance: Ampicillin

Vector Backbone Description: Backbone Size:4095; Vector Backbone:pcS2+; Vector Types:Xenopus Expression; Bacterial Resistance:Ampicillin

Comments: The original rat Frizzled-1 cDNA was cloned into CS2+. The CMV promoter was removed as a Sal-I-HindIII fragment, and the SV40 promoter fragment of the vector pCD-PS (as a Sal-I-SmaI fragment) was cloned in, destroying the HindIII site. As a result, this construct places the cDNA under the control of an SV40 promoter. Reference: The insert was published by Wang et al., JBC 271: 4468 (1996). This unpublished construct was generated by Julia Yang-Snyder.

Plasmid Name: XE180 rat Frizzled-1-pCD
