## pHIV-Luciferase

RRID:Addgene\_21375

Type: Plasmid

### Proper Citation

RRID:Addgene\_21375

### Plasmid Information

**URL:** <http://www.addgene.org/21375>

**Proper Citation:** RRID:Addgene\_21375

**Bacterial Resistance:** Ampicillin

**Vector Backbone Description:** Backbone Size:8713; Vector Backbone:pSICO; Vector Types:Mammalian Expression, Lentiviral; Bacterial Resistance:Ampicillin

**Comments:** The HIV-Luciferase plasmid encodes a self-inactivating lentiviral construct that was cloned by removing the U6-TATAlox-CMVie-EGFP-TATAlox- WPRE content of pSICO (Ventura et al., 2004), and adding the EF1-alpha promoter, a multiple cloning site (MCS), an internal ribosome entry site (IRES) and Luciferase. A cDNA can be cloned into the MCS (NotI, EcoRI, SmaI, and BamHI sites) to enable bicistronic expression with luciferase. This construct has not been published. NOTE: Addgene's stock is missing bp 6102-6190 compared to the original depositor's sequence. This deletion may affect some restriction sites, but not plasmid function.

**Plasmid Name:** pHIV-Luciferase

**Record Creation Time:** 20220422T222055+0000

**Record Last Update:** 20260829T080202+0000

### Ratings and Alerts

No rating or validation information has been found for pHIV-Luciferase.

No alerts have been found for pHIV-Luciferase.

### Data and Source Information

**Source:** [Addgene](#)

## Usage and Citation Metrics

We found 32 mentions in open access literature.

**Listed below are recent publications.** The full list is available at [RRID](#) .
