pCR241

RRID:Addgene_240644

Type: Plasmid

Proper Citation

RRID:Addgene_240644

Plasmid Information

URL: <http://www.addgene.org/240644>

Proper Citation: RRID:Addgene_240644

Insert Name: AIPGENE865 promoter

Organism: *Exaiptasia diaphana*

Bacterial Resistance: Ampicillin

Vector Backbone Description: Backbone Marker:Tim Howes; Backbone Size:3366; Vector Backbone:pT2HE; Vector Types:Gene expression and genomic integration in fish; Bacterial Resistance:Ampicillin

Comments: The whole intergenic region between AIPGENE865 (KXJ12416.1; Elongation Factor 1alpha) and AIPGENE899 was cloned as promoter fragment. The original gene annotation for AIPGENE865 is incorrect, the automatic NCBI annotation is correct in regards of exons, introns and translation start site. We found that *Aiptasia* strain CC7 was actually heterozygous for that locus: one allele was mostly in agreement with the genome sources but the other one had a couple of SNPs and a large, 749-bp insert in the intergenic region. The longer version with insert was used as promoter for this plasmid. AmNeonGreen is a version of mNeonGreen codon-optimized for *Aiptasia* (based on the transcriptome of Lehnert et al., 2014) with the identical protein sequence. Lehnert EM, Mouchka ME, Burriesci MS, Gallo ND, Schwarz JA, Pringle JR. 2014. Extensive differences in gene expression between symbiotic and aposymbiotic cnidarians. *G3* Bethesda Md. 4(2):277–295. doi:10.1534/g3.113.009084.

Plasmid Name: pCR241

Relevant Mutation: naturally occurring 749-bp insertion at bp 628 (from bp 1 of plasmid map), corrected exon/intron positions (in agreement with XM_021048156.2).

Record Creation Time: 20250820T052437+0000

Record Last Update: 20260829T082452+0000

Ratings and Alerts

No rating or validation information has been found for pCR241.

No alerts have been found for pCR241.
