Proper Citation: RRID:Addgene_36921

Insert Name: red fluorescent protein

Bacterial Resistance: Ampicillin

Defining Citation: [PMID:18183494](#)

Vector Backbone Description: Backbone Size:4802; Vector Backbone:pCAGGS; Vector Types:Mammalian Expression; Bacterial Resistance:Ampicillin

Comments: This vector contains a MCS and combines the Cre/loxP with a bicistronic transcript that contains dual fluorescent and bioluminescent cell markers. mRFP was used as a marker for easy genotyping and tissue labeling. A chimeric membrane-localizing luciferase/eGFP fusion protein was designed as a secondary marker, which upon Cre activation, highlights the cells expressing the transgene with eGFP as well as luciferase activity.
