pIRES-EGFP-puro

RRID:Addgene_45567

Type: Plasmid

Proper Citation

RRID:Addgene_45567

Plasmid Information

URL: <http://www.addgene.org/45567>

Proper Citation: RRID:Addgene_45567

Bacterial Resistance: Ampicillin

Vector Backbone Description: Backbone Marker:Clontech; Backbone Size:5729; Vector Backbone:pEGFP-C1; Vector Types:Mammalian Expression; Bacterial Resistance:Ampicillin

Comments: Plasmid pIRES-EGFP-puro was constructed containing the Phcmv promoter followed by unique restriction sites (NheI, XhoI, and SacI) for insertion of genes. Downstream, an IRES from the encephalomyocarditis virus directs the translation of EGFP-puro from the same mRNA. Addgene's sequencing results found differences compared to the depositing lab's sequence in the 3' region of the puro resistance marker. The resulting protein sequence matches NCBI WP_055528321.1 and should be functional.

Plasmid Name: pIRES-EGFP-puro

Record Creation Time: 20220422T222235+0000

Record Last Update: 20260815T081525+0000

Ratings and Alerts

No rating or validation information has been found for pIRES-EGFP-puro.

No alerts have been found for pIRES-EGFP-puro.
