Vector Backbone Description: Backbone Marker:Invitrogen; Backbone Size:4000; Vector Backbone:pCRII-Topo; Vector Types:in situ; Bacterial Resistance:Ampicillin

Comments: The Ptn fragment was amplified by RT-PCR using the following primer pair: GCCTACCCGTCCAAATATCC GCCAGTTCTGGTCTTCAAGG For in vitro transcription, use the NotI restriction digest and SP6 promoter for sense probe generation and the HindIII restriction digest and T7 promoter for antisense probe generation. Please note that Addgene's sequencing results match bp# 1241-1830 of NM_008973, not bp# 1238-1827 as indicated on plasmid map. The plasmid functions as described in the associated publication.
