Comments: This plasmid used to disturb miR164's expression by STTM method invented by Dr. Guiliang Tang's Lab in Michigan Technological University (Plant cell, 2012), Houghton, MI, USA. The method used to construct this plasmid refers to Tang et al., (Methods, 2012) with minor revision. The STTM sequence in this plasmid may contain discrepancies compared to the reference sequence(s). According to the depositing lab, these mutations should not affect plasmid function.
