Vector Backbone Description: Vector Backbone:pSIN; Vector Types:Lentiviral; Bacterial Resistance:Ampicillin

Comments: Additional growth instructions: For larger cultures, the depositing lab minipreps a sample before midiprepping. Perhaps if you are just making glycerol stocks try growing 2 or maybe 3 large cultures and miniprepping a sample to check for the full sized plasmid. They also try to start with a small sized colony and are more stringent about not letting the culture overgrow.
