Proper Citation: MacArthur Foundation (RRID:SCR_000612)

Description: The John D. and Catherine T. MacArthur Foundation supports creative people and effective institutions committed to building a more just, verdant, and peaceful world. In addition to selecting the MacArthur Fellows, the Foundation works to defend human rights, advance global conservation and security, make cities better places, and understand how technology is affecting children and society. MacArthur is one of the nation's largest independent foundations. Through the support it provides, the Foundation fosters the development of knowledge, nurtures individual creativity, strengthens institutions, helps improve public policy, and provides information to the public, primarily through support for public interest media. The Foundation makes grants and loans through four programs. * International Programs focus on international issues, including human rights and international justice, peace and security, conservation and sustainable development, higher education in Nigeria and Russia, migration, and population and reproductive health. MacArthur grantees work in about 60 countries; the Foundation has offices in India, Mexico, Nigeria, and Russia. * U.S. Programs address issues in the United States, including community and economic development; housing, with a focus on the preservation of affordable rental housing; juvenile justice reform; education, with an emerging interest in digital media and learning; and policy research and analysis. * Media, Culture, and Special Initiatives support public interest media, including public radio, documentary programming, and work to explore the use of digital technologies to reach and engage the public. Grants are also made to arts and cultural institutions in the Chicago area and for special initiatives. * The MacArthur Fellows Program awards five-year, unrestricted fellowships to individuals across all ages and fields who show exceptional merit and promise of continued creative work. It is limited to U.S. citizens and residents. John D. MacArthur (1897-1978) developed and owned Bankers Life and Casualty Company and other businesses, as well as considerable property in Florida and New York. His wife Catherine (1909-1981) held positions in many of these companies and served as a director of the Foundation.

Abbreviations: MacArthur Foundation

Synonyms: John D. and Catherine T. MacArthur Foundation
