Description: A not-for-profit organization to increase awareness of and find a cure for Alpha-1 Antitrypsin Deficiency that has invested nearly \$39 million to support Alpha-1 research at more than 70 institutions in North America, Europe and Australia. They are dedicated to providing the leadership and resources that will result in increased research, improved health, worldwide detection, and a cure for Alpha-1 Antitrypsin Deficiency. The Foundation has developed a solid infrastructure to promote research and the development of new therapies for improving the quality of life for those diagnosed with Alpha-1. It has fostered collaborations with investigators throughout the United States and Europe, working closely with the National Institutes of Health (NIH), the Food and Drug Administration (FDA), individuals affected by Alpha-1, and the pharmaceutical industry to expedite the development of improved therapies. The Foundation participates in industry and government liaison groups and develops strategic alliances with government, industry and other national and international health and research organizations. They're the source for all Alpha-1 and COPD-related info.
