Proper Citation: University of California at San Diego, Neurosciences Graduate Program
(RRID:SCR_001941)

Description: The Graduate Program in Neurosciences at the University of California, San Diego offers an outstanding opportunity for graduate training in one of the most highly interactive scientific environments available in the United States. Recently, our graduate program was named by the National Research Council of the National Academy of Sciences as the top-ranking neuroscience graduate program in the country. The faculty who participate in the Graduate Program in Neurosciences have been brought together from many campus departments, the School of Medicine and from a number of affiliated institutes, including the Salk Institute, the Scripps Research Institute, the Scripps Institute of Oceanography, the UCSD Medical Center, and the Veterans Administration Medical Center. Because there is an enormous breadth of neuroscience research interests represented among the faculty, students are able to pursue study in a wide range of neuroscience areas and they often carry out their dissertation research in collaboration with more than one laboratory. Sponsors: Funding for this program comes from the University of California at San Diego.
