Description: Life Alaska Donor Services is the tissue donation organization serving the state of Alaska, offering the option of donation to families who have suffered a death in Alaska. Life Alaska was established in 1991 as the state's tissue donation program. Since that time, Life Alaska has had many donors and has supplied thousands of tissues for transplantation to Alaskan patients. Life Alaska works in partnership with the federally designated Organ Procurement Organization in Washington (LifeCenter Northwest) to provide education on tissue and organ donation throughout the state. Tissue donations have taken place across the state, from Barrow to Ketchikan. The age criteria for transplantable tissues and organs are generally from birth to 80 years of age, with patients of any age being candidates for research. Tissues donated to Life Alaska are first offered to Alaskan patients and physicians before being made available outside the state. Organs are shared using the federally mandated national sharing system operated by the United Network for Organ Sharing and are first offered to transplant centers in the Pacific northwest.
