Proper Citation: SFARI - Simons Foundation Autism Research Initiative (RRID:SCR_004261)

Description: Launched in 2005, the Simons Foundation Autism Research Initiative (SFARI) is a research campaign within the Simons Foundation's overall suite of programs. SFARI's mission is to improve the diagnosis and treatment of autism spectrum disorders by funding, catalyzing and driving innovative research of the greatest quality and relevance. Although SFARI's priority is to benefit individuals challenged by these disorders, its efforts are certain to yield insights into the neural mechanisms of fundamental human capabilities, thereby promoting the broader mission of the Simons Foundation to advance the frontiers of research in the basic sciences and mathematics. Autism spectrum disorders are a set of complex developmental disorders characterized by persistent deficits in social communication and interaction, as well as restricted behaviors, interests or activities. The Centers for Disease Control and Prevention estimates that roughly 1 in 110 children in the U.S. have autism, with many more boys affected than girls. These disorders cost the U.S. economy an estimated \$35 billion dollars each year in direct care costs and lost productivity, and extract an incalculable human toll.

Abbreviations: SFARI

Synonyms: Simons Foundation Autism Research Initiative

Resource Type: data or information resource, funding resource, portal, topical portal, disease-related portal

Keywords: rfa, grant, autism spectrum disorder

Resource Name: SFARI - Simons Foundation Autism Research Initiative

Resource ID: SCR_004261

Alternate IDs: nlx_27321

Old URLs: <https://sfari.org/web/sfari/>

Record Creation Time: 20220129T080223+0000

Record Last Update: 20260811T043214+0000

Ratings and Alerts

No rating or validation information has been found for SFARI - Simons Foundation Autism Research Initiative.

No alerts have been found for SFARI - Simons Foundation Autism Research Initiative.
