Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on April 24, 2025. In 2009, the Medical School and the Michigan Institute for Clinical & Health Research (MICHHR) unveiled a new biorepository for U-M researchers in need of a controlled storage environment for biological samples. MICHHR is pleased to be able to add to its many services for the research community a centralized biological repository for controlled storage of biological samples, and related services (including DNA, RNA, and other downstream preparation) within the U-M campus. The biorepository, located in the CAP/CLIA-certified Michigan Center for Translational Pathology (MCTP) laboratory at the U-M Traverwood facility on Huron Parkway, will store biologic material, including blood and urine. Sample accessioning and tracking will be accomplished using the caTISSUE suite of programs, and samples will be processed and stored in compliance with CAP/CLIA guidelines. Initially, all samples will be used only with the authorization of the individual investigator who directed the project under which the samples were obtained. Samples will be used in accordance with the relevant informed consent. Long-term plans include federating the database in order to facilitate sharing of data and samples between research teams.

Abbreviations: MICHHR Biorepository

Resource Type: biomaterial supply resource, material resource

Keywords: biologic material, blood, urine
