**Proper Citation:** Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury (RRID:SCR\_004696)

**Description:** The Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury (DCoE) was established in November 2007 to integrate knowledge and identify, evaluate and disseminate evidence based practices and standards for the treatment of psychological health and TBI within the Defense Department. DCoE is part of the Military Health System, which provides a "continuum of care" from initial accession to deployment to discharge. DCoE works across the entire continuum of care to promote resilience, rehabilitation and reintegration for warriors, families and veterans with psychological health concerns and traumatic brain injuries. DCoE leads a groundbreaking collaborative effort that includes the Department of Veterans Affairs (VA), civilian agencies, community leaders, advocacy groups, clinical experts and academic institutions that are dedicated to expanding the state of knowledge of psychological health and TBI. In addition, DCoE's Real Warriors Campaign is working to encourage help-seeking behavior for warriors with post-traumatic stress or mTBI. DCoE brings together six directorates and three centers. Their joint goal is to maximize opportunities for warriors and families to thrive through a collaborative global network to promote resilience, recovery and reintegration for PH and TBI.

**Abbreviations:** DCoE
