Description: Non-profit academic organization for research and services in bioinformatics. Provides freely available data from life science experiments, performs basic research in computational biology, and offers user training programme, manages databases of biological data including nucleic acid, protein sequences, and macromolecular structures. Part of EMBL.

Abbreviations: EMBL-EBI

Synonyms: EBI, European Molecular Biology Laboratory - European Bioinformatics Institute

Resource Type: institution

Keywords: organization, academic, bioinformatics, research, service, data, computational, biology, training, database, DNA, protein

Funding: EMBL member states ;
European Union ;
NIH ;
Wellcome Trust ;
UK Research Councils ;
Industry Programme partners ;
BBSRC
