Description: The Pediatric Brain Tumor Foundation (PBTF) is a nonprofit organization dedicated to eradicating childhood brain tumors and providing support to families. It is a 501(c)(3) nonprofit charitable organization that seeks to * find the cause of and cure for childhood brain tumors by supporting medical research * increase public awareness about the severity and prevalence of childhood brain tumors * aid in the early detection and treatment of childhood brain tumors * support a national database on all primary brain tumors * provide educational and emotional support for children and families affected by this life-threatening disease. As the world's largest non-governmental source of funding for childhood brain tumor research, we're dedicated to not only eradicating this disease, but to providing support to families. Our educational resources deliver comfort and hope to families in need of information, and our college scholarship program gives brain tumor survivors a boost for the future. Through our efforts to raise public awareness, more attention has been focused on this deadly disease. Whether addressing congressional briefings or funding international conferences, the PBTF is an unwavering advocate. Together, we're making a difference in the lives of children with brain tumors. And with your continued help, we will cure the kids!
