Description: The Rocky Mountain Tissue Bank is a Colorado, 501c3 non-profit corporation, established in 1980. It is governed by a Board of Directors and is an independent tissue processing facility with no affiliation with any other tissue bank. It develops and produces irradiated allogenic cancellous bone and marrow for human transplantation. This product stimulates bone regeneration in patients with bone loss due to trauma, disease, or genetic malformation and provides a foundation for dental implants. The primary distribution network is through Periodontists, and Oral Surgeons and clinicians specializing in implant dentistry.
