Proper Citation: National AIDS Research Institute (RRID:SCR_005355)

Description: In the early nineties it became evident that HIV infection was spreading widely in India and the national efforts for control of HIV infection needed to be backed by quality research. It was also realized that AIDS, being a multifaceted disease, needed multi-disciplinary research involving virology, immunology, microbiology, clinical research, epidemiology, field based trials and social and behavioral research. An Institute devoted exclusively to HIV/ AIDS that could undertake research of such a diversity and magnitude was established to meet this requirement. National AIDS Research Institute (NARI) was established in October 1992 in Bhosari, Pune on a seven acre plot. The Institute has progressively expanded its activities in various aspects of research on HIV and AIDS through infra-structural development, capacity building & research programmes. The activities of NARI are supported by the ICMR & numerous extramural agencies. For the fiscal year 2005-2006 the ICMR allocated 5.66 crores for NARI. Additionally, over 13 crores have been generated through extramural sources. The Institute's research activities are guided by a Scientific Advisory Committee which includes eminent scientists from varied disciplines. All research projects are reviewed & approved by the Ethics Committee which also ensures that research is conducted with highest ethical standards. Establishment of a Community Advisory Board which acts as an interface between the community and the researchers is a pioneering effort by NARI.

Abbreviations: NARI

Synonyms: National AIDS Research Institute Pune

Resource Type: institution

Keywords: aids, human, human immunodeficiency virus

Funding: ICMR ;
extramural agencies

Resource Name: National AIDS Research Institute

Resource ID: SCR_005355

Alternate IDs: ISNI: 0000 0004 1803 003X, grid.419119.5, nlx_144414
