Description: The GNIF is a non-profit charity organization for the advancement of neurological and mental health patient welfare, education, and research. We aim to further brain related studies, end mental health stigmatization and discrimination, improve the well-being of afflicted individuals, promote the free and open-access distribution of brain related information, and institute universal and multidisciplinary distance educational programs. The paramount GNIF mission is the betterment of neurological and mental health patient welfare, education, and research. With the development of novel free and open-access Therapeutic Recreational Centers, health promotion campaigns, and other charitable activities throughout the world, this organization can aid diagnosed individuals and their advocates. By presenting free and open-access information and educational courses via a distance, the GNIF aims to educate clinicians, teachers, scientists, patients, and the general public on neuroscience, medicine, psychology, biotechnology, and computer science. Moreover, the GNIF supports a variety of sound research programs ranging from biomedical to spiritual studies on the nature of the mind-body connection, biopsychosocial model of health and disease, and health psychology/behavioral medicine practices. The Global Neuroscience Initiative Foundation (GNIF) offers several projects and partnerships adherent to its missions. The following is an alphabetical listing of the GNIF Project Directory: * Brain Blogger * Brain Sciences & Neuropsychiatry * Distance Education Division * Ethics in Mental Health * Knowledge Center * Living with a Brain Disorder * Neuropsychiatry for Kids * Surgical Webcasts * Therapeutic Recreational Centers * Visual Brain Application
