Description: Deric Bownds' Mindblog reports new ideas and work on mind, brain, and behavior - as well as random curious stuff. Deric Bownds, retired Univ. Wisc. Professor, studies brain and mind. My laboratory research of ~35 years contributed to our understanding of how vision works. This work was gradually phased out in the 1990's as I devoted increasing time to studying the evolution, development, and function of humans brains.
