Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on January 28,2025. The Stroke Patient Recovery Research Database (SPReD) initiative creates the infrastructure needed for the collection of a wide range of data related to stroke risk factors and to stroke recovery. It also promotes the analysis and management of large brain and vessel images. A major goal is to create a comprehensive electronic database Stroke Patient Recovery Research Database or SPReD and populate it with patient data, including demographic, biomarker, genetic and proteomic data and imaging data. SPReD will enable us to combine descriptions of our stroke patients from multiple projects that are geographically distributed. We will do this in a uniform fashion in order to enhance our ability to document rates of recovery; to study the effects of vascular risk factors and inflammatory biomarkers; and to use these data to improve their physical and cognitive recovery through innovative intervention programs. This comprehensive database will provide an integrated repository of data with which our researchers will investigate and test original ideas, ultimately leading to knowledge that can be applied clinically to benefit stroke survivors.

Abbreviations: SPReD

Synonyms: Stroke Patient Recovery Research Database

Resource Type: database, data or information resource, image

Keywords: stroke, demographic, biomarker, genetic, proteomic, imaging, clinical, brain, vessel, risk factor, recovery

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: Stroke Patient Recovery Research Database (SPReD)

Resource ID: SCR_005508

Alternate IDs: nlx_144609

Record Creation Time: 20220129T080230+0000

Record Last Update: 20260805T044122+0000

Ratings and Alerts

No rating or validation information has been found for Stroke Patient Recovery Research Database (SPReD).

No alerts have been found for Stroke Patient Recovery Research Database (SPReD).
