Proper Citation: Opasnet (RRID:SCR_005751)

Description: Opasnet is a wiki-based website and workspace for helping societal decision making. The website collects, synthesizes, and distributes people's values and scientific information. Opasnet welcomes anyone who wants to promote science-based decision-making in any field. The specialty is that the information is structured for both scientific scrutiny and for policy use at the same time. In practice, you can do original research, store data, make models, and perform policy assessments and discuss all of that work in one workspace. Originally, the developers of Opasnet came from the environmental health, i.e. a research field that studies the impacts of environment on human health. We are actively working, among other things, on climate change and air pollution, but you can also start a new assessment about a decision of your own interest, or participate in an existing assessment. Opasnet is a website that has basically two parts. One part is a wiki site (called Opasnet wiki or simply Opasnet) that has descriptive pages with text, figures, and tables; it also contains files. The other part is a database called Opasnet Base that contains quantitative estimates about anything that is described in Opasnet. The majority of information is openly available. However, both Opasnet wiki and Opasnet Base have a protected area for working with material that is non-public for some reason.

Abbreviations: Opasnet

Resource Type: database, data or information resource, wiki, knowledge environment, narrative resource

Keywords: decision making, environmental health, climate change, air pollution, problem solve, policy, science, public health, persistent pollutant, pollution, climate, environment

Funding: National Institute for Health and Welfare; Helsinki; Finland

Availability: GNU Free Documentation License

Resource Name: Opasnet

Resource ID: SCR_005751

Alternate IDs: nlx_149211

Record Creation Time: 20220129T080232+0000

Record Last Update: 20260815T182313+0000
