**Description:** The mission of the American Liver Foundation (ALF) is to facilitate, advocate and promote education, support and research for the prevention, treatment and cure of liver disease. These values guide our work as volunteers and staff of the American Liver Foundation as we move toward our ultimate goal of a world without liver disease. By living these values every day, we offer hope to all those affected by liver disease. * Research: Research is integral to the work of American Liver Foundation and is essential to improving treatment and finding cures. * Education: Many forms of liver disease are preventable, and many more can be cured if detected early. Yet tens of thousands of people in the U.S. are living with liver disease and don''t even know it. * Advocacy: American Liver Foundation takes a leadership role in advocating on behalf of the millions of Americans living with liver disease and their families.
