Proper Citation: DuraSpace (RRID:SCR_005866)

Description: DuraSpace sustains and grows its flagship repository platforms--Fedora and DSpace--while expanding into new technologies. DuraSpace is the independent 501(c)(3) not-for-profit born from a vision to help save our shared scholarly, scientific and cultural record. We are dedicated to sustaining and improving Fedora and DSpace, two of the most dominant open source repository solutions. We continue to lead the development and improvement of open technologies that provide long-term, durable access to your digital assets. Our new technology, DuraCloud, will exploit digital preservation support services in the cloud. We are also expanding into new areas that include exploring strategies on how to manage the "data deluge" and addressing the challenge of converting the overwhelming amount of data produced by scholars and scientists into useful information. DuraSpace is committed to providing leadership and innovation in the development and deployment of open technologies that promote durable, persistent access to digital data. We collaborate with academic, scientific, cultural, and technology communities in creating practical solutions to help ensure that current and future generations have access to our collective digital heritage. Our values are expressed in our organizational byline, open technologies for durable digital content.
